

On-site Municipal Wastewater KPDES Training

Making the connection between daily operations of your wastewater facility and compliance with your KPDES permit can be challenging. This comprehensive training course will help ensure that a facility achieves and maintains compliance with KPDES permit conditions as it relates to daily operations and maintenance. Topics covered include understanding KPDES permits, discharge monitoring reports (DMRs) and how to avoid enforcement. It is designed for operators and system managers at municipal wastewater systems. Attendees are encouraged to bring copies of KPDES permits and DMRs for hands-on Q&A sessions. Certified wastewater operators can earn up to 5 continuing education hours.
