Testing, testing, 1 2 3

Strategies for Taking Standardized Tests
‘Twas the Night Before Testing

• Go to bed on time.
• Put a few number 2 pencils with erasers in your backpack.
• Solve family/friend problems before the testing date.
• Talk to your parents about any concerns that you might have about the test.
The Morning of Testing

• Start your day as you always do.
• Eat a good breakfast.
• Think of what you will do to relax after you get home from school.
• Think Positive!
Multiple Choice Questions

• If you do not understand the directions, ask for help.

• Read the question and all answer choices before marking anything.
Pace Yourself

• Don’t spend too much time on any one question. Do your best and then move on.
• Answers the easiest questions first, but be sure to go back to those questions you skipped.
Multiple Choice Questions

• Do not change your answers unless you are very uncertain about your first answer choice.

• Try to answer every question. Make the most intelligent guess you can.
The Process of Elimination

- After you have been through all of the questions once, go back and find questions you have some knowledge about and eliminate choices that you know are incorrect.

I know C isn’t the answer!
The Process of Elimination

• If you can eliminate two wrong answers, your chance of choosing the right answer is greater.
Answering Questions

- Don't guess blindly, but if you have time to think about the best answer choice, make it!
Skip, Return, Check

• If you finish early, check to make sure you have answered all questions.
Key Words

• Find **key words or phrases** in the question that will help you choose the correct answer.
Are we communicating?

• Make sure you understand what the question is asking.
• Be sure you are responding to the question that is being asked.
Reading Passages

• If the test requires you to read passages and then answer questions about what you read, read the questions first.

• By doing this, you will know what you are looking for as you read. This also helps you go faster on the test.
Reading Passages

• When there are several questions about a reading passage or chart, look for **clues** in other questions that will help you with those items about which you are unsure.
Math Computation

• When using scratch paper on a math test, double check to make sure that you have copied the problem correctly from the test booklet!
Math Computation

• Line up place value correctly on your scratch paper (thousands, hundreds, tens, ones) or the answer will be incorrect.
Math Computation

• If your answer does not match one of the choices, reread the problem, recopy the numbers, and try solving it again.
A Matter of Time

• If any time remains, spend it on those questions about which you know nothing or almost nothing.
• As you go back through, do not change all answers.
• Remember: Your first guess is usually right.
It’s About Time

• Don’t spend too much time rewriting or obsessing about neatness.

• Don’t worry if you run out of time.
Final Tips

• Fill in bubbles fully, write neatly, and erase stray marks.
• Double-check the test number in your test booklet against the answer sheet every few questions to be sure you haven’t gotten on the wrong number.
The Death Grip

• If your arm tires during testing it is probably due to the grip that you have on your pencil.

• Relax the grip and give those muscles a break.

• Do not do arm exercises during testing as this disturbs others.
Thank you, Mr. Know-it-all!

• Remember *it's okay not to know everything* — unlike class tests, these tests will have some questions designed to challenge the limits of your knowledge at a grade level above your current grade.
For Teachers

• **Test the Best!** Lesson plans and activities to prepare students for standardized tests.
