

Confused about environmental regulations for agriculture?

Environmental regulations can be confusing. How we manage and interact with our land, air and water resources can have large impacts on the health of the environment. Join us for a one-day environmental boot camp designed for the agricultural community and those who work with the community. Presenters from the Department for Environmental Protection and the University of Kentucky's Biosystems & Agriculture Engineering Program will break down what you need to know to keep a farm in compliance. See the [draft agenda](#).

What will be covered?

- Common issues and solutions
- Air, water and waste regulations that pertain to farms
- Resources for compliance

Who should attend?

- Ag Extension Agents
- Agricultural Associations
- Crop Consultants
- Technical Service Providers
- Commodity Groups
- Producers

Cost: \$40
KY EXCEL Members \$20

London

Tuesday, Feb. 23, 2016

Class Time: 9 a.m.–4:30 p.m. EST
