

# Redevelopment Piece By Piece

Piecing together funding, technical assistance and resources to make redevelopment happen.

Join us for a series of short workshops and webinars that will help you take old, abandoned properties from blight to bright. Properties such as abandoned hospitals, dry cleaning sites, old schools, mine-scarred lands, former gas stations and other potentially contaminated sites dot our landscape and can pull down an entire neighborhood. However, they could be catalysts for broader community redevelopment. Pick and choose the workshops that will help you and your community succeed in bringing properties back to life.
